Installation Procedure

The wall mount bracket is first fastened to the wall then the kiosk is fastened to the wall mount bracket. The AC Power Cord and the LAN Cable go through a hole in the bottom of the kiosk and into the mount bracket; the cables feed toward the back of the bracket and out a hole in the bottom of it.

1. Install the Wall Mount Bracket.

NCR recommends locating the wall mount bracket so that the base of the bracket is 907 mm (35.71 in.) above the floor. Be sure that the mounting is adequate to support the weight of the kiosk: 23.2 kg (51.1 lbs). Also, be sure that the location provides adequate access and service clearance for the kiosk as identified in the *NCR Voyix SelfServ™ 90 (7709) Site Preparation Guide*.

2. Install the Mounting Screws (3) on the right side of the bracket. Do not tighten the Mounting Screws, leave room for the kiosk cabinet to slide under the screw heads or lock—washers.
